Chain pickerel	Sunfish
Hornpout (bullhead)	

Physical Characteristics

Area - 417 acres	Temperatures
	Surface - 74 °F
Maximum depth - 14 feet	14 feet - 73 °F

Principal Fisheries: Smallmouth bass, white perch, chain pickerel

Davis Pond, also known as Eddington Pond, is a shallow, warmwater pond located next to Route 9 (the "Airline") just a short drive from the Bangor-Brewer area. Because of its proximity to this population center, the pond is popular with fishermen, swimmers, and pleasure boaters. The so-called "Thoroughfare" between Davis Pond and Holbrook Pond is popular with nature lovers and canoeists. Ducks, loons, muskrat, and other aquatic wildlife abound in this marshy habitat.

Davis Pond represents an opportunity to catch smallmouth bass, white perch, and chain pickerel, as well as yellow perch and hornpout. It should continue to be managed for its warmwater gamefish species; no stocking is recommended.
